TÜBİTAK UME

TÜRKAK Reference Material Producer TS EN ISO 17034 AB-0001-RM

Certificate of the Reference Material

Name of the Material	:	Glucose
Material Code	:	UME CRM 1310
Issue Date	:	25.08.2016
Revision Date	:	21.09.2026 (Revision history can be found on the last page)
Validity Period of the Certificate	:	5 years from the sales date
Certified Values	:	

Parameter	Certified Value [1]	Uncertainty [2]
$\delta^{13}C_{VPDB\text{-}LSVEC}$	-11.19 ‰	0.68 ‰

[1] Certified value is determined by calculating average value of accepted comparison study results participated by 7 laboratories using EA-IRMS method. Measurement results are determined by measuring two independent units with three replicates in two different days by each laboratory. Measurement results are traceable to the international Vienna-Pee Dee Belemnite (VPDB-LSVEC) reference scale and expressed in parts per thousand relative difference ($\delta^{13}C_{VPDB\text{-}LSVEC}$,‰) from VPDB-LSVEC.

[2] The expanded uncertainty of certified value includes characterization, homogeneity, stability components and is stated as the standard uncertainty of measurement multiplied by the coverage factor *k*=2, which for a normal distribution corresponds to a coverage probability of approximately 95%. The standard uncertainty of measurement has been determined in accordance with GUM “Guide to the Expression of Uncertainty in Measurement”.

TÜBİTAK UME has been accredited by TÜRKAK as a reference material producer under the accreditation number AB-0001-RM in accordance with the TS EN ISO 17034:2018 standard.

Turkish Accreditation Agency (TÜRKAK) is a signatory to the European Cooperation for Accreditation (EA) Multilateral Agreement (MLA) and the International Laboratory Accreditation Cooperation (ILAC) Mutual Recognition Arrangement (MRA) for the recognition of reference material certificates.

Description

A unit contains approximately 1 gram of glucose (powder) in 5 ml amber glass vial with screw cap. Additional information about the material and the certification process is presented in the certification report.

Intended Use

This material is intended to be used for method validation, quality control and correction factor determination in $\delta^{13}C_{VPDB\text{-}LSVEC}$ measurements by EA-IRMS method.

Instructions for Use

All precautions must be taken in order to prevent contamination during the use of the bottle. Minimum sample intake amount is 0.2 mg. This material can be transferred at ambient temperature if the temperature does not exceed +60 °C for no longer than 4 weeks.

Storage Conditions

Material should be stored in dry conditions at (+20 ± 5) °C.

TÜBİTAK UME cannot be held responsible for changes that might happen to the material at customer's premises due to noncompliance to the instructions for use, and the storage conditions given in the certificate.

Safety Information

Usual laboratory precautions apply. It is strongly recommended that the material must be handled and disposed according to the safety guidelines where applicable. Please refer to the Safety Data Sheet before any use of the material.
